\* Putter postponed until February because of snow

### President's Putter Career Records:

Society members' records in the Putter are provided in the following pages. Members are ranked as follows:

- By the points accumulated over the previous five years (this is explained further below)
- By career consistency (a measure of a player's win performance over an extended period of time)

### Five-Year Ranking

The table below imitates golf and cricket rankings by listing the most dominant golfer in the Putter over five year periods. Points are allocated according to the rounds reached over the last five Putters up to and including the year concerned. Points are awarded as follows:

Winner	10	Last 16	3
Runner-Up	8	Last 32	2
Semi-Finalist	6	Last 64	1
Quarter-Finalist	4		

### Career Consistency Ranking

This measure, introduced in 2015, takes into account both a player's win percentage and the extent of his/her participation in the Putter over the years. For example, for two players with the same win percentage, the one having played most Putters (and hence matches) would rank ahead of the other. Consistency scores range from 1.0 (highest consistency) to 0.0 (lowest consistency). To score 1.0 the player would have had to have recorded the most number of matches played (currently 138) and have a win percentage of 100%. Players that have very high win percentages yet have played in relatively few Putters have lower consistency scores (typically in the range 0.3 to 0.4).
